- ★ Vanilla JavaScript
- ★ Firebase/MongoDB

## ABOUT ME

I am Brhane Giday, a BSc graduate in Electrical and computer engineering (computer Engineering major). I graduated with distinction from Addis Ababa University (AAU) in July 2019. Growing curiosity and penchant for science, especially IT and mathematics saw me opting for Computer programming.

Currently, I am working as a Front-end developer and UI/UX designer. So far in my career, I met with different clients; I developed small to large scope projects for my clients. My goal is to contribute brand-new technology to the world. My daily plan is to learn/know new things and stay updated every time with new ICT features.

Proven ability to take an idea from conception to application to revenue driver, making thoughtful business and design decisions throughout development and lifecycle. Speaking the languages of designers, developers, and users in fostering smart collaboration. A humble team player leading by influence and genuine passion for crafting solutions.

**Andrew Carnegie** is my role model and he built his legacy in my heart

## EDUCATION

- ★ 2010-2012 **Axum Secondary School**
- ★ 2012-2014 **Axum Preparatory School**
- ★ 2014- 2019 **Addis Ababa University**

---

## PROFESSIONAL EXPERIENCES

### Foxconn Technology Group (Apr 2019 – Nov 2019)

- ★ **Electronic information and communication Engineer**– I have joined Foxconn company as a system quality engineer. I worked for 4 months in the mobile assembly in Fushan Inc. sub-company in Vietnam.

### North computing group (Dec 2019 --Aug 2020)

- ★ **Team Leader**– North computing group had more than 8 employees working on Web designing and development. I was working as a Team leader and organizer of the company. I managed the team to fulfill their daily task and perform according to their schedule.
- ★ **Web Developer and Systeme Designer**– in addition to leading the team, I was working closely in system design and web development

### Mad Technologies(Sep 2020 - Oct 2021)

- ★ **Frontend Web developer**– I have developed more than 7 projects with modern Javascript frameworks
- ★ **UI designer**– besides working on web development, I was working in UI designing and prototyping
- ★ **WordPress developer**– while I was in MAD technologies, I worked on a content management system and I have developed more than 7 projects with WordPress

### DoubleDice (Feb 2022 – now)

- ★ **Frontend Web developer**– Since I joined DoubleDice in February, I have been working on developing web applications with modern Javascript frameworks. This company gave me an opportunity to work with different experienced developers.
